**Identified HUB Vendors by CMBL Class
and Commodity Description**

Using the Centralized Master Bidders List – HUB Directory to Locate Historically Underutilized Businesses (HUBs)

General Information

As part of the good faith effort outreach process (Method B), Bidders/Proposers are responsible for utilizing the Centralized Master Bidders List (CMBL) - HUB Directory to locate potential HUB subcontractors. The list is maintained by the Texas Comptroller of Public Accounts (CPA). Bidders/Proposers using Methods A (1) or A (2) should use the database to verify the HUB status of all subcontractors listed/notified in their HSP. The Texas Lottery Commission does not endorse, recommend or attest to the capabilities of any company or individual listed.

The database may be accessed via the internet at:

<https://mycpa.cpa.state.tx.us/tpasscmbsearch/tpasscmbsearch.do>

The CMBL - HUB Directory is a “live” database that is updated on a continuous basis. **NOTE: Vendors who are currently HUB certified will have a HUB status of “A- Active” when viewed in the Detail List format. When viewing a vendor’s complete profile, a certified HUB will show a HUB status of “Active Bidder (A – Approved; Active Texas certified HUB).” All other HUB status codes indicate that a vendor is either inactive or not a HUB.** Be sure to list or solicit only HUB vendors who are certified at the time that you are preparing the HSP.

When using Method B, you must also access the following list on the CPA website to locate at least two trade organizations or development centers that serve members of the HUB groups, in order to notify them of each identified subcontracting opportunity:

<https://comptroller.texas.gov/purchasing/vendor/hub/resources.php>

These entities have expressed their willingness to accept notices of subcontracting opportunities from vendors to distribute to their members.

The following pages contain general information to assist Bidders/Proposers in using the CPA database.

Using the Centralized Master Bidders List (CMBL) – HUB Directory to Locate Historically Underutilized Businesses (HUBs)

Instructions

I. Introduction

This guide is designed to assist you in accessing and using the CMBL – HUB Directory to locate HUB vendors who can provide specific goods or services and/or to verify HUB status. Note that you can view additional information by clicking on the “help” link displayed in the upper right hand corner of the CMBL – HUB Directory search screen.

II. Access the CMBL – HUB Directory via the internet:

<https://mycpa.cpa.state.tx.us/tpasscmbldsearch/tpasscmbldsearch.do>

CMBL – HUB Directory Search Screen

Use the various search selection criteria to create lists of potential vendors as well as retrieve specific vendor information. The “help” sections below explain the search criteria options.

After selecting desired search criteria, click on the “**Search**” button to begin the search.

Clicking on the “**Clear Search**” button will remove all information you have entered or selected, and thereby defaulting back to the original settings.

Specific vendor data options

Use the following optional fields to refine vendor-specific search results:

“Search For” - This feature is used to specify whether you want to search for vendors who are registered on the CMBL, and/or vendors who are a Texas certified HUB.	
CMBL Only	Search results will consist of active vendors who are registered on the CMBL regardless of whether they are a Texas certified HUB. This result will include both HUB and non-HUB vendors. NOTE: Only those vendors marked with a HUB status of “A-Active” are currently certified.
HUBs Only	Search results will consist of Active vendors who are a Texas certified HUB, regardless of whether they are registered on the CMBL.
HUBs on CMBL	Search results will consist of Active vendors who are a Texas certified HUB registered on the CMBL.
All Vendors	Search results will consist of Active vendors that are registered on the CMBL, and active vendors who are a Texas certified HUB. This result will include both HUBs and non-HUB vendors.

Note that the check list in the “Select Fields for Output” box allows the user to customize the information that will be displayed in the search results. You may check as many or as few fields as appropriate. These selections will not work with the following two output options: 1) all contact information, or 2) two column mailing labels, because these options have a pre-determined format.

“Output” Options	
The user can determine output format by selecting the appropriate option from the drop down menu located next to the words “Output as” at the bottom of the search screen.	
Detail List	Produces a list of summary information for each vendor that meets the search criteria. Clicking on the links to either a vendor name or vendor ID will provide more detailed information, including a list of the commodity classes and items that the vendor has associated with their profile.
All Contact Information	Produces a profile box that displays complete contact information for each vendor, including address, phone, fax, contact name, and a business description.
Excel Spreadsheet	Generates a list in an Excel spreadsheet (this option will only work if the list is 1,000 vendors or less).
Other available options are: downloading to a text file (Max 1000 vendors), producing a comma or Pipe (1) Delimited List, or generating two column mailing labels.	

“Sort by” Options
The user can sort by Vendor Name, Vendor ID, City, Zip Code, HUB Eligibility/HUB Gender, or HUB Status, by selecting the appropriate option from the drop down menu next to the words “Sort by” at the bottom of the search screen.

III. Using the “Single Vendor Search” to Locate a Specific Vendor

“Single Vendor Search” - This feature may be used to narrow your search to a specific vendor.	
Vendor ID (VID) Number	Enter at a minimum, the first 10-digits of the company’s 13-digit VID Number you are searching for. Example: 199999999900. Search results will consist of vendor profiles matching the VID Number you entered based on the “Search For” criteria you selected.
Vendor Number	Enter the 5 or 6-digit Vendor Number of the company you are searching for. Example: 99999 or 999999. Search results will provide the vendor profile matching the Vendor Number you entered based on the “Search For” criteria you selected.
Vendor Name	Enter a portion of the company’s name you are searching for. Example: ABC Logistics Company. In the example given, it is recommended that you enter “Logistics” because “ABC” may have spaces or periods between them. The search results will provide the vendor profiles that have a company name containing “Logistics” based on the “Search For” criteria you selected.
Include Inactive Vendors	This feature can be used to include inactive vendor profiles to the search results based on the “Search For” criteria you selected, and the VID Number, or Vendor Number or Vendor Name you entered.

IV. Using the “Multiple Vendor Search” to Generate a List of HUB Vendors

“Multiple Vendor Search” - This feature can be used to narrow your search to vendors who can provide goods and/or services based on the National Institute of Governmental Purchasing codes they have identified in their company’s CMBL/HUB vendor profiles.	
NIGP Class Code	NIGP Class Codes are 3-digit numbers that represent a general description of the goods or services vendors may provide. As referenced in the NIGP Commodity Code Book, the general description for 3-digit Class Code “005” is “Abrasives” whereas the general description for 3-digit Class Code “010” is “Acoustical Tile, Insulating Materials, and Supplies.”
Items	Item codes are 2-digit numbers that represent a more defined description of the goods or services vendors can offer. As referenced in the NIGP Commodity Code Book, the 2-digit Item code “05” represents “Abrasive Equipment and Tools” within Class Code “005” whereas the 2-digit Item code “14” represents “Abrasives, Coated: Cloth, Fiber, Sandpaper, etc.” within Class Code “005.” Note: You must use a comma to separate multiple Item codes. Example: Item = 05,14,21
Highway District(s)	The State of Texas is divided into 25 Highway Districts which include designated counties. Vendors specify within their CMBL/HUB vendor profiles the highway districts to which they can provide their goods and services. Note: You must use a comma to separate multiple Highway District codes. Example: 01,03,22

For more information about using NIGP commodity codes, please refer to Section VII of this document.

Step	Action
1.	Select a search option. You may use either “HUBs Only” or “HUBs on the CMBL.”
2.	Select the desired format from the drop down menu next to the words “Output as” in the “Output Options” box. If you would like to customize the information that will be displayed, check the appropriate fields in the “Select Fields for Output” box.
3.	Select the desired sort option from the drop down menu next to the words “Sort by” in the “Output Options” box.
4.	In the “Multiple Vendor Search” box, enter the appropriate class and item codes into the field labeled “Selection 1” in the. You may enter up to three class codes to produce a list of HUBs who can provide one or more of the selected classes. You may also enter multiple item numbers, separated by a comma in the “items” field for a list of HUBs who can provide one or more of the selected items. NOTE: You may view the Commodity Code List by clicking on the “Class Code” or “Item Code” blue hot keys.
5.	If you choose to limit the list by highway district, enter the district number. NOTE: You may view highway district Information by clicking on the “Highway District” blue hot key.
6.	If you choose to limit the list by County, City or Zip Code, enter the appropriate information into the fields in the “Business Category/Vendor Location Search” box. If you have already limited by district, this additional information is not necessary.
7.	Press the “Search” button in the bottom left hand corner of the screen.

The HUB status codes indicate whether or not a particular vendor is an active HUB. The status codes may be viewed on-line by clicking on the “HUB Status” hot key. **NOTE: Vendors who are currently HUB certified will have a HUB status of “A- Active” when viewed in the Detail List format. When viewing a vendor’s complete profile, a certified HUB will show a HUB status of “Active Bidder (A – Approved; Active Texas certified HUB)”. All other HUB status codes indicate that a vendor is either inactive or not a HUB.**

V. Business Category/Vendor Location Search

Business Category/Vendor Location Search” - This feature may be used to identify vendors within a general Business Category and/or located within a specific County, City, Zip Code or Highway District.	
Business Category	For the purposes of CMBL/HUB registration, vendors are grouped into one of the following categories: 01 - Heavy Construction other than Building Contracts 02 - Building Construction, including General Contractors and Operative Builders 03 - Special Trade Construction 04 - Financial and Accounting Services 05 - Architectural/Engineering and Surveying Services 06 - Other Services including Legal Services 07 - Commodities Wholesale 08 - Commodities Manufacturers 09 - Medical
County Location	Texas County in which the vendor is located based on the mailing address in its CMBL/HUB vendor profile.
City Location	City in which the vendor is located based on the mailing address in its CMBL/HUB vendor profile.
Zip Code Location	Zip code in which the vendor is located based on the mailing address in its CMBL/HUB vendor profile. Specify 5-digit zip codes like “78701” or 9-digit zip codes like “78701-1234”.
Highway District(s) Location	The State of Texas is divided into 25 Highway Districts which include designated counties. Vendors specify within their CMBL/HUB vendor profiles the highway districts to which they can provide their goods and services. Note: You must use a comma to separate multiple Highway District codes. Example: 01,03,22

“Select Fields For Output” - Select the fields of information that you would like have displayed in the search results. Some fields are preselected and may be unchecked if desired.

“Output Options” - Select the format in which you would like the information to be displayed. Note: If the search results exceed 1,000 vendors, you will have to select “Comma Delimited List” or “Tab Delimited List” which you can save and import into another median such as Excel.

VI. Using the NIGP Commodity Code

The NIGP Commodity Code is a system of classifying goods and services by general descriptions (classes) and specific descriptions (items). NIGP Class-Item Codes contain five digits. To obtain the five digit code, combine the three digit class code with its corresponding two digit item number. Note that all class codes of 900 and above are for services.

EXAMPLE: Class 615 is described as “Office Supplies, General,” and Item 81 is described as “Staples.” If you were looking for vendors to provide staples, you would use Class/Item 615-81 to do your CMBL - HUB Directory search.

There are several ways to view the NIGP code on the CPA website:

Commodity Code Listing by Class

This list includes a “hot key” for each class code. By clicking on the hot key, you can view the particular class with a sub-listing of individual item codes and descriptions. Classes are general headings, so if you can’t locate an item, try using the Commodity Code Search Screen.

Access the Commodity Code Listing by Class at:

<https://mycpa.cpa.state.tx.us/commbook/>

From this screen, you can enter a key word or words to match. Matches will contain all words entered. You can also do a search by three digit class code.

Access the Commodity Code Search Screen at:

<https://mycpa.cpa.state.tx.us/commbook/indexSearch>

CLASS 559: MASS TRANSPORTATION, RAIL VEHICLE PARTS AND ACCESSORIES

Item Numbers and Commodity Descriptions:

559-70 Signage: Destination, Routing and Advertising
